Creating Great Public Spaces for a Vibrant Community

Through our Parks & Public Space Initiative, the Oklahoma City Community Foundation is working to create more usable public spaces for the community. At Webster Middle School in south Oklahoma City, a group of community partners, including the nonprofit organization Fields & Futures, renovated the school grounds. They created new athletic fields for the students, and a Parks & Public Space Initiative grant helped fund a walking/running track complete with landscaping and trees. The resulting school park will be enjoyed by the surrounding community for years to come.

The track at Webster Middle School in south Oklahoma City was made possible through a grant from our Parks & Public Space Initiative to Fields & Futures.
