

Charitable Organization Endowment Fund Distributions Unaffected by Economic Downturn

Central Oklahoma nonprofits participating in the Community Foundation's Charitable Organization Endowment program recently received a total of \$5.2 million in annual endowment distributions. Because of the Community Foundation's disciplined long-term investment strategy, the distribution amount was not affected by the economic downturn caused by COVID-19, and this year's distribution is an increase in what was given in 2019.

In addition to an increased distribution amount, nonprofits also received this year's distribution months in advance to help with current fundraising and cash flow needs that might have been affected by the pandemic.

Charitable Organization Endowment funds are established by both charitable organizations and individual donors who have a significant interest in supporting the respective organizations. To learn more, visit [OCCE.org/COEGift](https://occf.org/COEGift).
